VALIDATED CONTENT MIGRATION
CONSULTING FOR LIFE SCIENCES
Fast, cost-effective content migrations, from one or many systems, fully compliant with 21 CFR Part 11

OVERVIEW
There are nearly as many reasons for life sciences companies to perform content migrations as there are life sciences companies. These include:

- Merger and acquisition activity
- Lack of support for legacy systems
- Hardware maintenance costs outstripping migration costs
- Compliance, regulatory or patient safety issues
- Need for a more robust content management solution

The costs of maintaining aging or disparate systems are obvious, but the solution has not always been – until now.

EMC Information Intelligence Group (IIG) Consulting Life Sciences Practice is pleased to offer validated content migration solutions for life sciences firms. Our content migration experts deploy a number of approaches, EMC products, as well as third party solutions, to analyze existing processes, plan the transition, obtain buy-in, migrate data, content and metadata, and perform in-depth validations to ensure migration quality and regulatory compliance.

USE CASES
EMC IIG validated content migrations for life sciences support a variety of use cases, including:

- Migrating content from legacy Documentum applications and third-party platforms (e.g. FirstDoc, SharePoint, NextDocs, FirstPoint, GXPharma, Qumas & DocuShare) to the EMC Documentum Life Sciences Solution Suite, built on Documentum D2
- Migrating from older versions of Documentum (e.g. Documentum Compliance Manager) to current versions
- Migrating on-premise applications to off-premise cloud solutions

ESSENTIALS
Customer Benefits
- Dedicated EMC Information Intelligence Group (IIG) Consulting Life Sciences team, with an average of 15 years of industry experience and proven methodologies, reduces risk and cost of migrations
- Fully validated migration with guaranteed 21 CFR Part 11 compliance and data integrity
- Migration from any combination of data repositories, databases or file shares
- Migration up to 10 times faster than conventional approaches, with minimal downtime
WHY EMC IIG CONTENT MIGRATION?
The combination of our people, methodology and toolsets provide unparalleled value, certainty and patient safety.

- Fully validated content migration, with guaranteed 21 CFR Part 11 compliance and data integrity
- Established methodology to reduce risk and speed migrations
- Full, verifiable audit trails
- Advanced security encryption during migration
- Migration to EMC Documentum repository from one or many sources, including repositories, file shares and databases
- Automated metadata transformations for standardization of data values and formats
- EMC IIG Education role-based training to make migration project teams more productive, independent, and effective

DOCUMENTUM ENTERPRISE MIGRATION APPLIANCE (EMA)
Many content migrations can be accomplished by leveraging the advanced Documentum® Enterprise Migration Appliance (EMA). Available only through EMC, EMA runs on VMware® and EMC technology and addresses the most common use cases for Documentum upgrades and migrations. This results in the following benefits:

- Rapid and scalable content migrations up to 10 times faster than with traditional API tools, or custom API migrations
- Overall migration cost reductions of 50 percent or more
- Overall migration time reductions of up to 90 percent, allowing for multiple dry runs of even the most complex migrations
- Minimal application downtime
- Improved migration performance and stability
- Migration of as many as 1.2 million objects per hour
- Greatly reduced disruption to normal business operations
